PROFILE

Web and WordPress Developer with hands-on experience in designing, developing, and managing responsive, high-performing websites. Skilled in WordPress theme customization, plugin integration, WooCommerce setup, and front-end development, delivering secure, efficient, and user-focused web solutions.

In addition to web development, I specialize in SEO, graphic design, and digital marketing. Effective in reaching the right audience, I am capable of creating holistic digital strategies that combine technology and marketing to maximize online visibility, engagement, and business growth.

WORK EXPERIENCE

June 2025 - Present

Freelance WordPress and Web Content.

- Designed, managed, and updated WordPress and WooCommerce-based websites for business and healthcare clients.
- Managed products, categories, menus, and content to ensure smooth navigation and a user-friendly experience.
- Uploaded and formatted blog posts and pages while following SEO best practices and brand guidelines.
- Customized website layouts using Elementor and basic custom CSS for responsive and visually appealing designs.
- Integrated and configured essential WordPress plugins to enhance website functionality and performance.
- Performed basic website optimization tasks including image compression, broken link checks, and plugin updates.
- Maintained website content accuracy and structure to support regular updates and long-term scalability.

DESIGNED WEBSITES

MENTORSHIP

Worked closely under the guidance of a Senior Web Developer with expertise in Web Design, CMS Development, Domain & Hosting Management, SEO, SMM, and Digital Branding. This mentorship strengthened my understanding of practical development workflows, client requirements, site optimization, and overall project management.
