

Get tested for

MyDiabetes Care

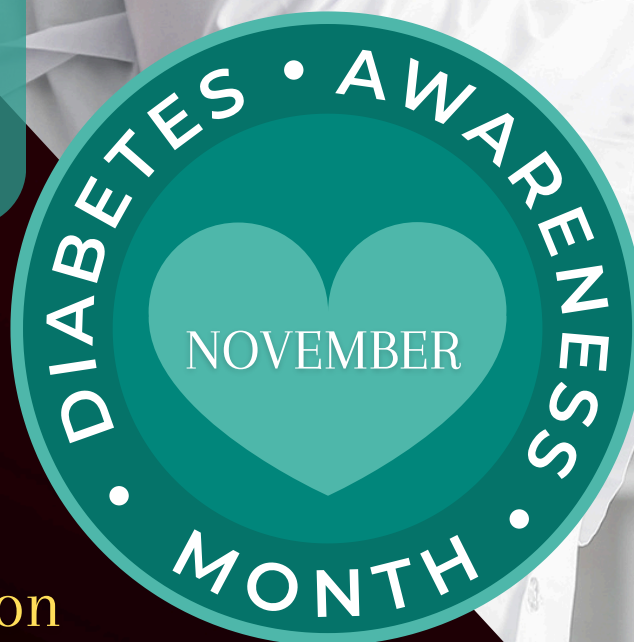

Early detection for lifelong sugar control.

MyDiabetes Care is a group of blood tests used to detect early signs of diabetes or prediabetes. It typically includes:

- Fasting Blood Glucose (FBG): Measures blood sugar after an overnight fast.
- Hemoglobin A1c (HbA1c): Reflects average blood sugar levels over the past 2–3 months.
- Oral Glucose Tolerance Test (OGTT): Measures how the body handles sugar over time.
- Random Blood Sugar (RBS): Measures blood sugar at any time of day.

This profile helps in diagnosing diabetes, assessing risk, and guiding treatment decisions.
